

Cummins 8.3 Litre ISM (2007)

Part No. 069-3638 & 069-3655

EGR System Consists of:

- Hot side EGR valve (before EGR cooler) controls Exhaust gases for proper emissions control of No, gases
- EGR cooler (controls temperature of Exhaust gases to the air Intake to the engine)
- EGR cooler bypass valve (controls exhaust flow temperature to the air intake from the exhaust through the EGR cooler) Model year 2008 Present
- EGR temperature sensor (measures EGR cooler Exhaust temperature and efficiency)

These items are critical for proper emissions management control and must be cleaned on a regular basis for optimum efficiency.

First steps before any service can be performed:

- 1. Add DieselTune[™] Max Strength Fuel Injector Cleaner (400-3012) to vehicle's fuel tank.
- 2. Remove plastic engine cover.
- 3. If engine is hot, the EGR cooler must be cooled.

Tools and Adapters Required:
