

OPTIMA™

eBOOST™ AC/R Acid Neutralizer

eBOOST™ AC/R Acid Neutralizer is a professional chemical tool that actively locates and neutralizes acids in AC/R systems caused by moisture, compressor burnout and lubricant/refrigerant gas breakdown.

ADDITIONAL BENEFITS

- Prevents the formation of acid and for use in systems that are showing signs of acid build up
- Fast and immediate results
- Safe and effective for all systems
- Treats up to 6 tons
- Packaged in sealed trilingual (English, French and Spanish) clamshell with hang tab, color insert card and instructions

EASY-TO-USE INSTRUCTIONS

1. Turn AC/R system on and set to lowest temperature.
2. Hold syringe end upright and unscrew (remove) blue cap.
3. Select a 1/4" hose (black o-ring) or 5/16" hose (green o-ring).
4. Attach threaded end of hose to syringe.
5. Gently push plunger and fill clear hose with solution (to displace all air from hose).
6. Connect hose to system low pressure service port and inject 100% of solution.
7. Disconnect hose/syringe from system and discard.
8. Continue to run system for 30 minutes.

AVAILABILITY:

Item	Description	Size	Case Qt
OPEBA6S	AC/R Acid Neutralizer includes 1/4 SAE & 5/16 SAE clear flexible adapters	1 oz/30ml	15/per
